

# BIOF 091: Image Processing and Computer Vision with MATLAB

This course provides hands-on experience with performing image analysis. Examples and exercises demonstrate the use of appropriate MATLAB® and Image Processing Toolbox™ functionality throughout the analysis process. The course also provides hands-on experience with performing computer vision tasks. Examples and exercises demonstrate the use of appropriate MATLAB® and Computer Vision System Toolbox™ functionality.

**Credits:** 2

**Class Type:** Workshop

**Prerequisites:**

*BIOF 090 or equivalent MATLAB experience.*

**Program:** Bioinformatics and Data Science

**Availability** Currently Not Available
